

QUALITY POLICY

A substantial prerequisite for our company's success is the quality of the steel sections. The Management of Stahlwerk Thüringen GmbH also attaches importance to high quality products for guaranteeing the future of the company.

An efficient quality management system comprising all steps of the production process and operational activities is the basis for this. This quality management system as integrated part of the management system of SWT not only focusses on the quality assurance of the finished products, but also includes in particular the preventive quality assurance measures for the order management, the production preparation and purchasing.

Due to this, the time and effort needed for rectifications can be kept to a minimum and the required quality can be achieved in a cost-effective manner resulting in a competitive price-cost-ratio.

Statement 1: Quality in all fields is the core of our company culture.

Statement 2: Quality means to meet the customer requirements.

Statement 3: Advanced plant and equipment equipped with most modern process control are prerequisites for a preventive quality assurance.

Statement 4: Worldwide presence on the sales markets enables real customer focus and contact.

Statement 5: Entrepreneurial thinking at all levels releases energy and saves costs.

Written commitment to the quality management system is stipulated in the Management Manual which is used as management tool.
